

Linux Ubuntu 26.04 Manual Pages on command 'xkbwatch.1'

\$ man xkbwatch.1

xkbwatch(1) General Commands Manual xkbwatch(1)

NAME

xkbwatch - XKB extension user utility

DESCRIPTION

This program reports changes in the fundamental components of the XKB keyboard state plus the effective compatibility state.

OPTIONS

Xkbwatch accepts all of the standard X Toolkit command line options along with the additional options listed below:

-version

This option indicates that the program version should be printed, after which the program exits.
