

NAME

XtGetDisplays – retrieve a list of displays associated with an application context

SYNTAX

```
void XtGetDisplays(XtAppContext app_context, Display ***dpy_return, Cardinal* num_dpy_return);
```

ARGUMENTS

app_context Specifies the application context.

dpy_return Returns a list of open X display connections in the specified application context.

num_dpy_return Returns the count of open X display connections in *dpy_return*.

DESCRIPTION

To free the list of displays, use **XtFree**.
