

NAME

dmmp_path_group_status_get – Retrieve path group status.

SYNOPSIS

```
uint32_t dmmp_path_group_status_get (struct dmmp_path_group *dmmp_pg);
```

ARGUMENTS

dmmp_pg Pointer of 'struct dmmp_path_group'. If this pointer is NULL, your program will be terminated by assert.

DESCRIPTION

The valid path group statuses are:

* DMMP_PATH_GROUP_STATUS_UNKNOWN

* DMMP_PATH_GROUP_STATUS_ENABLED -- standby to be active

* DMMP_PATH_GROUP_STATUS_DISABLED -- disabled due to all path down

* DMMP_PATH_GROUP_STATUS_ACTIVE -- selected to handle I/O

RETURN

uint32_t.
