

NAME

docker-logout - Log out from a Docker registry

SYNOPSIS

docker logout [SERVER]

DESCRIPTION

Log out of a Docker Registry located on the specified **SERVER**. You can specify a URL or a hostname for the **SERVER** value. If you do not specify a **SERVER**, the command attempts to log you out of Docker's public registry located at `https://registry-1.docker.io/` by default.

EXAMPLES**Log out from a registry on your localhost**

```
# docker logout localhost:8080
```

See also

docker-login(1) to log in to a Docker registry server.

OPTIONS

-h, --help[=false] help for logout
