NAME

      grub-editenv − edit GRUB environment block

SYNOPSIS

      grub-editenv [*OPTION*...] *FILENAME COMMAND*

DESCRIPTION

      Tool to edit environment block.

            Commands:

      create   Create a blank environment block file.

      list   List the current variables.

      set [NAME=VALUE ...]

            Set variables.

      unset [NAME ...]

            Delete variables.

            Options:

      −?, **−−help**

            give this help list

      −−usage

            give a short usage message

      −v, **−−verbose**

            print verbose messages.

      −V, **−−version**

            print program version

      If FILENAME is '−', the default value */boot/grub/grubenv* is used.

      There is no 'delete' command; if you want to delete the whole environment block, use 'rm /boot/grub/grubenv'.

REPORTING BUGS

      Report bugs to <bug−grub@gnu.org>.

SEE ALSO

      grub-reboot(8), **grub-set-default**(8)

      The full documentation for **grub-editenv** is maintained as a Texinfo manual. If the **info** and **grub-editenv** programs are properly installed at your site, the command

            info grub-editenv

      should give you access to the complete manual.
