

NAME

/etc/modules - kernel modules to load at boot time

DESCRIPTION

The */etc/modules* file contains the names of kernel modules that are to be loaded at boot time, one per line. Options can only be specified using **modprobe.d** configuration files. Lines beginning with a '#' are ignored.

EXAMPLE

```
# /etc/modules: kernel modules to load at boot time.
#
# This file contains the names of kernel modules that
# should be loaded at boot time, one per line. Lines
# beginning with "#" are ignored.
