

NAME

pkaction – Get details about a registered action

SYNOPSIS

pkaction [**--version**] [**--help**]

pkaction [**--verbose**]

pkaction --action-id *action* [**--verbose**]

DESCRIPTION

pkaction is used to obtain information about registered PolicyKit actions. If called with **--action-id** then all actions are displayed. Otherwise the action *action*. If called without the **--verbose** option only the name of the action is shown. Otherwise details about the actions are shown.

RETURN VALUE

On success **pkaction** returns 0. Otherwise a non-zero value is returned and a diagnostic message is printed on standard error.

AUTHOR

Written by David Zeuthen <davidz@redhat.com> with a lot of help from many others.

BUGS

Please send bug reports to either the distribution or the polkit-devel mailing list, see the link <http://lists.freedesktop.org/mailman/listinfo/polkit-devel> on how to subscribe.
