## NAME
rtkitctl − Realtime Policy and Watchdog daemon control

## SYNOPSIS
**rtkitctl** [*options*]

## DESCRIPTION
**RealtimeKit** is a D-Bus system service that changes the scheduling policy of user processes/threads to SCHED_RR (i.e. realtime scheduling mode) on request. It is intended to be used as a secure mechanism to allow real-time scheduling to be used by normal user processes.

## OPTIONS
**−h, −−help**
Show a summary of options.

**−−version**
Show version.

**−−reset−known**
Reset real-time status of known threads.

**−−reset−all**
Reset real-time status of all threads.

**−−start**
Start RealtimeKit if it is not running already.

**−k, −−exit**
Terminate running RealtimeKit daemon.

## AUTHOR
RealtimeKit was written by Lennart Poettering <lennart@poettering.net>.
