

NAME

runc-list – lists containers

SYNOPSIS

runc list [*option ...*]

DESCRIPTION

The **list** commands lists containers. Note that a global **---root** option can be specified to change the default root. For the description of **---root**, see **runc(8)**.

OPTIONS

---format|-f table|json : Specify the format. Default is **table**. The **json** format provides more details.

---quiet|-q : Only display container IDs.

EXAMPLES

To list containers created with the default root:

```
# runc list
```

To list containers in a human-readable JSON (with the help of **jq(1)** utility):

```
# runc list -f json | jq
```

To list containers created with the root of **/tmp/myroot**:

```
# runc ---root /tmp/myroot
```

SEE ALSO

runc(8).
