

NAME

sbverify - UEFI secure boot verification tool

SYNOPSIS

sbverify [*options*] **--cert** <*certfile*> <*efi-boot-image*>

DESCRIPTION

Verify a UEFI secure boot image.

OPTIONS

--cert <*certfile*>

certificate (x509 certificate)

--list list all signatures (but don't verify)

--detached <*file*>

read signature from <*file*>, instead of looking for an embedded signature
