

NAME

systemd-portabled.service, systemd-portabled – Portable service manager

SYNOPSIS

systemd-portabled.service

/lib/systemd/systemd-portabled

DESCRIPTION

systemd-portabled is a system service that may be used to attach, detach and inspect portable service images.

Most of **systemd-portabled**'s functionality is accessible through the **portablectl(1)** command.

See the [Portable Services Documentation](#)^[1] for details about the concepts this service implements.

SEE ALSO

systemd(1), **portablectl(1)**
