

NAME

tzselect – select a timezone

SYNOPSIS

tzselect

DESCRIPTION

The **tzselect** program asks the user for information about the current location, and outputs the resulting timezone description to standard output. The output is suitable as a value for the **TZ** environment variable.

All interaction with the user is done via standard input and standard error.

EXIT STATUS

The exit status is zero if a timezone was successfully obtained from the user, and is nonzero otherwise.

ENVIRONMENT

AWK Name of a POSIX-compliant *awk* program (default: **awk**).

TZDIR

Name of the directory containing timezone data files (default: */usr/share/zoneinfo*).

FILES

TZDIR/iso3166.tab

Table of ISO 3166 2-letter country codes and country names.

TZDIR/zone.tab

Table of country codes, latitude and longitude, TZ values, and descriptive comments.

TZDIR/TZ

Timezone data file for timezone *TZ*.

SEE ALSO

tzfile(5), **zdump(8)**, **zic(8)**

COLOPHON

This page is part of release 5.05 of the Linux *man-pages* project. A description of the project, information about reporting bugs, and the latest version of this page, can be found at <https://www.kernel.org/doc/man-pages/>.
