Free Linux Man Pages

As Searchable PDF — With Live Internet URLs

The world's most comprehensive FREE IT & DevOps library — 50,000+ PDFs, 2,600+ videos, every Linux command, programming language & tool at your fingertips.

www.MyWebUniversity.com

Wahidullah Lutfy · Founder of MyWebUniversity

The Problem We Solve

Students & developers shouldn't need expensive books or paywalled courses to master technology

Expensive Textbooks

CS textbooks cost \$150–\$300. Students working full-time can't afford them. This was Wahidullah's own struggle during his B.S. and M.S. degrees.

Paywalled Bootcamps

Coding bootcamps charge \$10,000–\$20,000. Quality education shouldn't be locked behind a credit card.

Scattered Documentation

Official man pages, language docs, and references are spread across dozens of websites — hard to find, harder to search.

Language Barriers

Most free resources are English-only. Dari/Farsi-speaking developers have almost nothing in their language.

The Solution: man2pdf

One URL. Any Linux command. Instant PDF — generated live from Ubuntu 24.04 LTS.

 <https://www.mywebuniversity.com/cgi-bin/man2pdf.cgi?cmd=python+java+npm+node>

→ Generates python.pdf, java.pdf, npm.pdf, node.pdf — instantly, for free

Instant PDF Generation

Type any command, get a beautifully formatted PDF of its full man page in seconds. No login. No signup. No cost.

Ctrl+F Search Inside PDF

Every PDF is fully searchable. Press Ctrl+F to find any flag, option, or function instantly — just like a real book.

Live Internet URLs Embedded

Every URL referenced in the man page — python.org, nodejs.org, oracle Java, ruby-lang.org, golang.org, perl.org — is clickable inside the PDF.

Multi-Command in One URL

?cmd=python+java+npm+node generates all four PDFs at once with a summary table and download buttons.

Section Support

?cmd=-s+3+printf gets printf section 3 (C library).
?cmd=-s+8+mount gets the sysadmin mount page.
Full man section control.

Download Button

Every PDF has an Open button AND a Download button. Save locally, share with teammates, or print for offline study.

What's Inside Every PDF

Anatomy of a Man Page PDF

NAME	What the command does — one-line summary
SYNOPSIS	Exact syntax — every flag and argument
DESCRIPTION	Full explanation with examples
OPTIONS	Every -flag documented in detail
EXAMPLES	Real-world usage patterns
FILES	Config files and important paths
SEE ALSO	Related commands with live links
BUGS / NOTES	Known issues and version history
SOURCE URLS	🔗 All https:// links are clickable!

Commands You Can Search

Shell & Core Utils

bash, zsh, sh, grep, sed, awk, find, ls, cp, mv, rm, tar, cpio

Networking

ssh, openssl, ssl, curl, wget, ip, ss, nc, nmap, rsync, scp, sftp

System Admin

systemd, cron, ps, kill, top, df, du, mount, fsck, mkfs, fdisk

Programming

python, python3, java, gcc, g++, gdb, perl, ruby, node, npm, npx

C Library (-s 3)

printf, scanf, malloc, fopen, socket, pthread, regex, signal

Databases & More

mysql, sqlite3, psql, pip3, pip, go, rust, php, lua, tcl, gawk

How to Use It — 3 Simple Steps

1

Open the URL

Visit:
<https://www.mywebuniversity.com/cgi-bin/man2pdf.cgi>

*Works on any browser, any device,
anywhere in the world. No account needed.*

2

Type Your Command(s)

Single command:
`?cmd=python`

Multiple at once:
`?cmd=python+java+npm+npv`

With section:
`?cmd=-s+3+printf`

*Case-insensitive: 'Python' = 'python'
Commas or spaces also work.*

3

Get Your PDF

- Click  Open to view in browser
- Click  Download to save offline
- Press `Ctrl+F` to search inside
- Click any  `https://` URL to visit the official source site

*Your PDF includes every official
URL from the original documentation.*

 *Pro Tip: Save this URL as a bookmark and share it with your team — it works for EVERY Linux command, language, and tool!*

All content is 100% FREE — No paywalls · No subscriptions · No ads interrupting learning

Who Is This For?

If you work with technology — this is for you

Students

- Can't afford expensive textbooks?
- Need the official reference — not a blog post?
- Study anywhere — download PDFs for offline use
- Every language from Python to C to Java

Developers

- Look up any flag or option in seconds
- Multi-command search: python+node+npm at once
- Click embedded URLs to go straight to source docs
- Works for C library functions with -s 3 section

Data Scientists

- NumPy, pandas, scikit-learn ecosystem docs
- Python, R, and Julia command references
- All pip3 and conda package documentation
- Official source URLs for every library

DevOps Engineers

- systemd, cron, mount, fsck — all section 8
- SSH, OpenSSL, networking commands
- Docker, Kubernetes, bash scripting references
- Bookmark for your entire team's use

Sysadmins

- Every Linux man page as searchable PDF
- RHEL 9.2, Rocky Linux 9.2, Ubuntu LTS
- Section 1, 2, 3, 5, 7, 8 — all supported
- Offline-friendly: download and share

Dari/Farsi Speakers

- Dedicated Dari YouTube channel: 500+ videos
- Same content in your native language
- @MyWebUniversity-Dari on YouTube
- First comprehensive CS education in Dari

The Story Behind MyWebUniversity

The Struggle

While earning his B.S. and M.S. in Computer Science — working full-time — Wahidullah couldn't afford all the textbooks. He understood the pain of wanting to learn but being blocked by cost.

The Spark

A Pasadena City College student asked for a PDF of the Python textbook because he couldn't afford the \$80 price tag. That moment reignited a mission.

The Solution

Wahidullah wrote Python scripts to convert Linux man pages, Windows help files, and PowerShell cmdlets into searchable PDFs — 50,000+ documents — all free.

The Mission

'By sharing we all care — someday thousands of educators will share knowledge like a binary tree, rooting in every community worldwide.' — Wahidullah Lutfy
