PYTHON DATA STRUCTURES II

PART 11 OF 11

Classes and Objects in Python: Inheritance, Polymorphism and a Pet Class

Where to find the official docs, then object-oriented Python: classes as blueprints and objects as instances, inheritance, the chapter 14 Pet class with __init__ and self, polymorphism, and where to find more videos on lists, tuples and classes.

0:00	Where to look things up
1:01	Object-oriented programming: classes and objects
2:30	Inheritance
3:43	Chapter 14: the Pet class
4:19	__init__ and self
5:55	Polymorphism
8:11	Tuples in the language reference
8:41	More videos to watch

COMMANDS SHOWN IN THIS PART

```
$ class Pet:
$ def __init__(self, name):
$ self.name = name
$ def speak(self): ...
```
