

SHORT 1 · WHAT IS A COMPUTER?

You use one every day

But do you know what it really is?

A Computer Is…

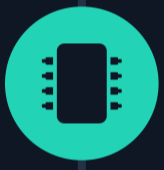

An electronic machine that takes in data, follows instructions to process it, stores it, and gives you a result.

How Every Computer Works

Input

You give it data — typing, touching, speaking

Process

The CPU follows instructions

Storage

It saves data for later

Output

It shows the result — screen, sound, print

Computers Are Everywhere

Smartphone

Laptop

Bank ATM

Modern car

Smart TV

Game console

REMEMBER

Input → Process → Storage → Output

SHORT 2 · WHY LEARN COMPUTERS?

Computer skills open doors

5 reasons to start today

5 Reasons

Jobs

Most jobs today need computer skills

Education

Learn almost anything online, free

Remote work

Work for companies around the world

Communication

Connect with people and teams

Business

Start and grow your own business

Your Laptop Can Be Your Office

With the right skills and an internet connection, you can work remotely — from home, for companies anywhere.

Skills Grow Step by Step

Basics

Understand the computer

Tools

Learn the key programs

Specialize

Pick one field and go deep

Career

Turn your skills into income

REMEMBER

Skills + Internet = Opportunity

Your learning roadmap

SHORT 3 · YOUR ROADMAP

13 topics. Short videos. Big future.

Here is your roadmap

Your Roadmap

Foundations

Hardware · Software · Operating systems

Systems

Networks · Databases · Apps · Compilers

Career skills

Programming languages · Companies

Get hired

Apply · Interview · Free resources

How to Learn Fast

15 minutes a day

Watch one short, then practice

Practice

Try it yourself on a real computer

Ask questions

Write them in the comments

Repeat

Rewatch until it clicks

START NOW

One short a day changes your future

NEXT TOPIC

Topic 2: What is hardware?
